3rd Edition of the AnimArt International Festival of Animation Art

Lodz, Poland 29th September – 10th October 2017

The AnimArt International Festival of Animation Art is the greatest and the only Polish event dedicated to the animation art as a whole. The idea lying behind the festival is to praise the importance of the animation art that unfortunately begins to sink into oblivion. Its mission is to present the most precious occurrences and trends in the contemporary animation, comparison of the achievements of Polish, European and world artists from the puppet theatre and film animation.

In a way, the festival is a continuation of the International Festival of Solo Puppeteers and the TrotuArt International Festival of Street Art – both huge festivals organized by the theatre for 15 years which have been highly valued by not only the audience but also authorities and media.

The AnimArt Festival 2017 is comprised of the following parts:

Re//Master – a series of performances presented by masters of animation
Re//Animations – a series of performances entering the festival competition
Re//Actions – a series of open-air performances presented in the city area
Re//Activations – panel discussions devoted to problems of the contemporary animation
Re//Visions – exhibitions accompanying the AnimArt Festival
